PRINCIPLES OF ENTREPRENEURSHIP EVENT

PARTICIPANT INSTRUCTIONS

(quoted directly from DECA, INC)

- “The event will be presented to you through your reading of the 21st Century Skills, Performance Indicators and Case Study Situation. You will have up to 10 minutes to review this information and prepare your presentation. You may make notes to use during your presentation.”
- “You will have up to 10 minutes to make your presentation to the judge (you may have more than one judge).”
- “You will be evaluated on how well you meet the performance indicators of this event.”
- “Turn in all of your notes and event materials when you have completed the event.”

21st CENTURY SKILLS

- Critical Thinking – Reason effectively and use systems thinking.
- Communication – Communicate clearly.
- Creativity and Innovation – Show evidence of creativity.

PERFORMANCE INDICATORS

1. Discuss the nature of information management.
2. Assess information needs.
3. Identify ways that technology impacts business.
4. Apply information to accomplish a task.

EVENT SITUATION

You are to assume the role of the owner of FRESH FIT MEALS, a local meal-prep delivery startup. A potential investor (judge) has asked you to explain how you will manage customer information to justify scaling the business.

FRESH FIT MEALS has been operating for six months, cooking and delivering healthy, pre-portioned meals to customers within a 10-mile radius. Currently, you manage all orders through text messages and a simple spreadsheet. You do not have a formal database, and customer preferences (allergies, delivery times, favorite ingredients) are often remembered by memory or written on sticky notes.

You want to expand FRESH FIT MEALS to cover the entire county and hire two delivery drivers. However, the potential investor (judge) is concerned that your current method of managing information is inefficient and risky for a larger operation.

The potential investor (judge) wants you to present a plan for upgrading your information management system. The investor wants to know specifically what customer data you need to collect to make the expansion successful, how you will collect it efficiently using technology, and how you will use that information to improve the business.

You will present your information management plan to the potential investor (judge) in a role-play to take place in the investor's office. The potential investor (judge) will begin the role-play by asking about your current data practices. After you have explained your plan and answered the investor's (judge's) questions, the investor (judge) will conclude the role-play by thanking you for your work.

Possible Judge's Questions:

1. How will you ensure the personal data you collect from customers remains secure?
2. Beyond basic contact information, what specific data point could help us increase sales per customer?
